

9th DRMC International Tech Carnival 2026

AI Web Development Contest — Rulebook

Theme: Smart Club Operations

Project Overview:

Traditionally, club events and programs heavily rely on third-party tools like Google Forms for registrations. This often creates an unprofessional user experience.

For this challenge, participants will build a web platform for a student organization (such as DRMC IT club). The participants have to build a platform which can manage the registration of events (eliminating the need of google forms). An organization may host multiple fests, and each fest may contain multiple events. Users should be able to browse fests, explore the events within each fest, and register for individual events. Organizers should be able to create, manage, and monitor festivals and the events belonging to each festival.

Organization → Fest → Event → Registration

For example:

Judging Criteria (Total 120 pts)

Fest Directory — 30 pts

Requirement	Points
Display available/upcoming fests	5 pts
Event cards/list contain useful information	5 pt
Search events	5 pt
Event categories and filter	5 pt
Open an event from the fest directory to its details page which shows details such as deadline/capacity	5 pt

(Plus 5 pts general UX/responsiveness evaluation across this section)

Registration System — 30 pts

Requirement	Points
Users can register for an event	5 pts
Registration form works correctly	5 pts
Registration confirmation	5 pts
Registration limits/deadlines work	5 pt
Users can view/manage their registration	5 pts

(Plus 5 pts general functionality evaluation across this section)

Organizer Management — 30 pts

Requirement	Points
Organizer/admin dashboard	5 pts
View registered participants	5 pts
Search/filter participants	5 pt
Manage participant registration status	5 pts
Event/registration statistics or useful management tools	5 pts

(Plus 5 pts general tool responsiveness evaluation across this section)

Bonus — 30 pts

Requirement	Points
You can implement any creative solution of your own as extra	30 pts

Creativity showcase from participants will be valued in judgement

Submission Guidelines & Timeline

- **Timeline:** Topics and guidelines are released on **October 4th**. Final submissions are due by **October 9th at 11:59 PM**.
- **Platform & Submission:** The codebase must be entirely open source, pushed to a **public GitHub repository**, and the repository link must be submitted via the official **Google Form**.
- **License:** The GitHub repository must include an **MIT License**.
- **Deployment:** A working deployment URL/domain must be provided so judges can evaluate the project without running it locally.
- **Sample Data:** The deployed application must contain sufficient sample/mock data for judges to meaningfully evaluate the required features. Judges should not be required to manually create all initial tests, events, or participants before evaluating the system. Any mock data or AI-generated data can be used to showcase the use case.
- **Tech Stack & AI:** Participants may choose their preferred technology stack and backend (which must remain functional till the evaluation date). Any AI agents/tools can be used.
- **Open Source:** Participants can use any existing open-source projects, APIs, datasets, images, fonts, or other assets, but are fully responsible for complying with their respective terms and licenses.
- **Repository Access:** The GitHub repository visibility must be set to **Public** so judges can evaluate the code.
- **Code Reuse & Starter Templates:** Participants are allowed to use code reuse, boilerplates, open-source libraries, and starter templates to speed up development.
- **UI Responsiveness:** The web application **must be fully responsive** and functional across all screen sizes (mobile, tablet, and desktop).

Required README Structure

A well-structured README file containing at minimum:

1. Project name
2. Project description
3. Features
4. Tech stack
5. Setup instructions
6. Deployment URL
7. Demo credentials (if login/admin is required)
8. Third-party services/APIs

9. AI tools/features used (Disclosing tools like Cursor, Claude, ChatGPT, etc.)
10. Screenshots
11. Known limitations
12. License
13. The organizing authority reserves the right to make the final decision regarding rule interpretation, eligibility, judging, scoring, and any matters not explicitly covered in these guidelines. All decisions made by the judging panel and organizing authority shall be final.
